What We watched on Netflix

4	2	8
Netflix Reports	Files	Columns

- Netflix reports hours watched for each movie and show every six months.
- Views = hours viewed divided by runtime (a rough count of how many times a title was watched).
- Each row is one title in one report, so a title can appear more than once.

Our Questions:

Q1 **Does newer content get more views on Netflix?**

Q2 **Does global availability lead to more views?**

Newer Content vs Older Content

Scatter Plot

- Show individual observations across content ages
- Reveal overall relationships and trends

Point-Range Plot

- Summarize median views and the interquartile range across age groups
- Compare typical views and variability

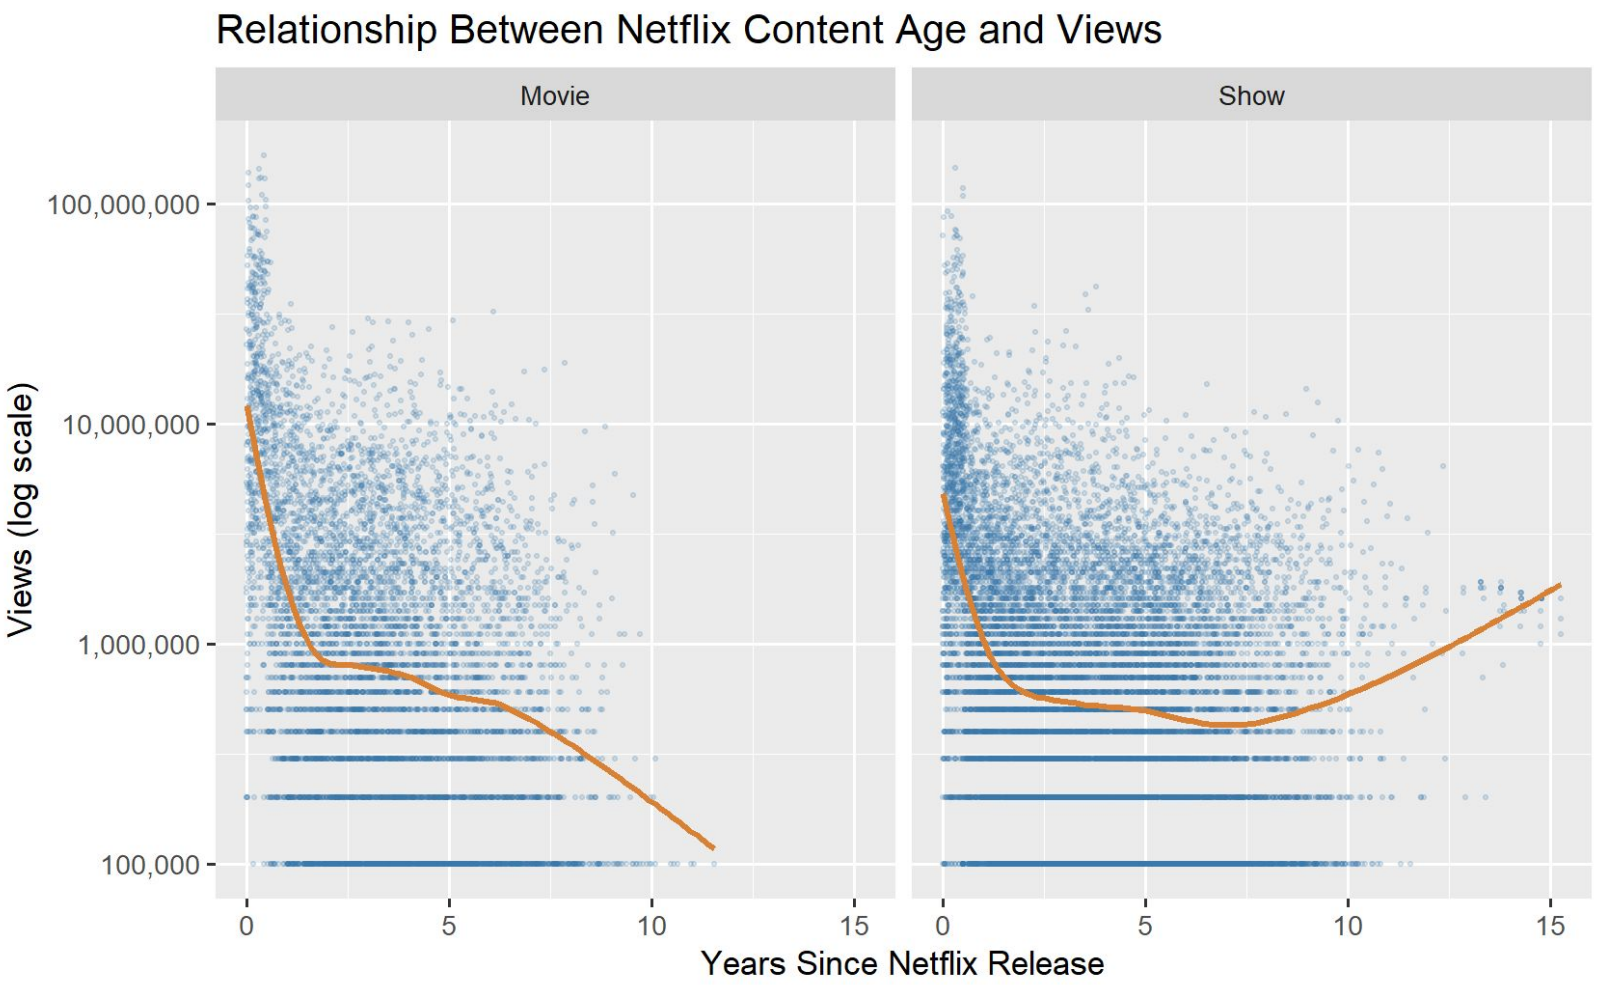

Calculating Content Age

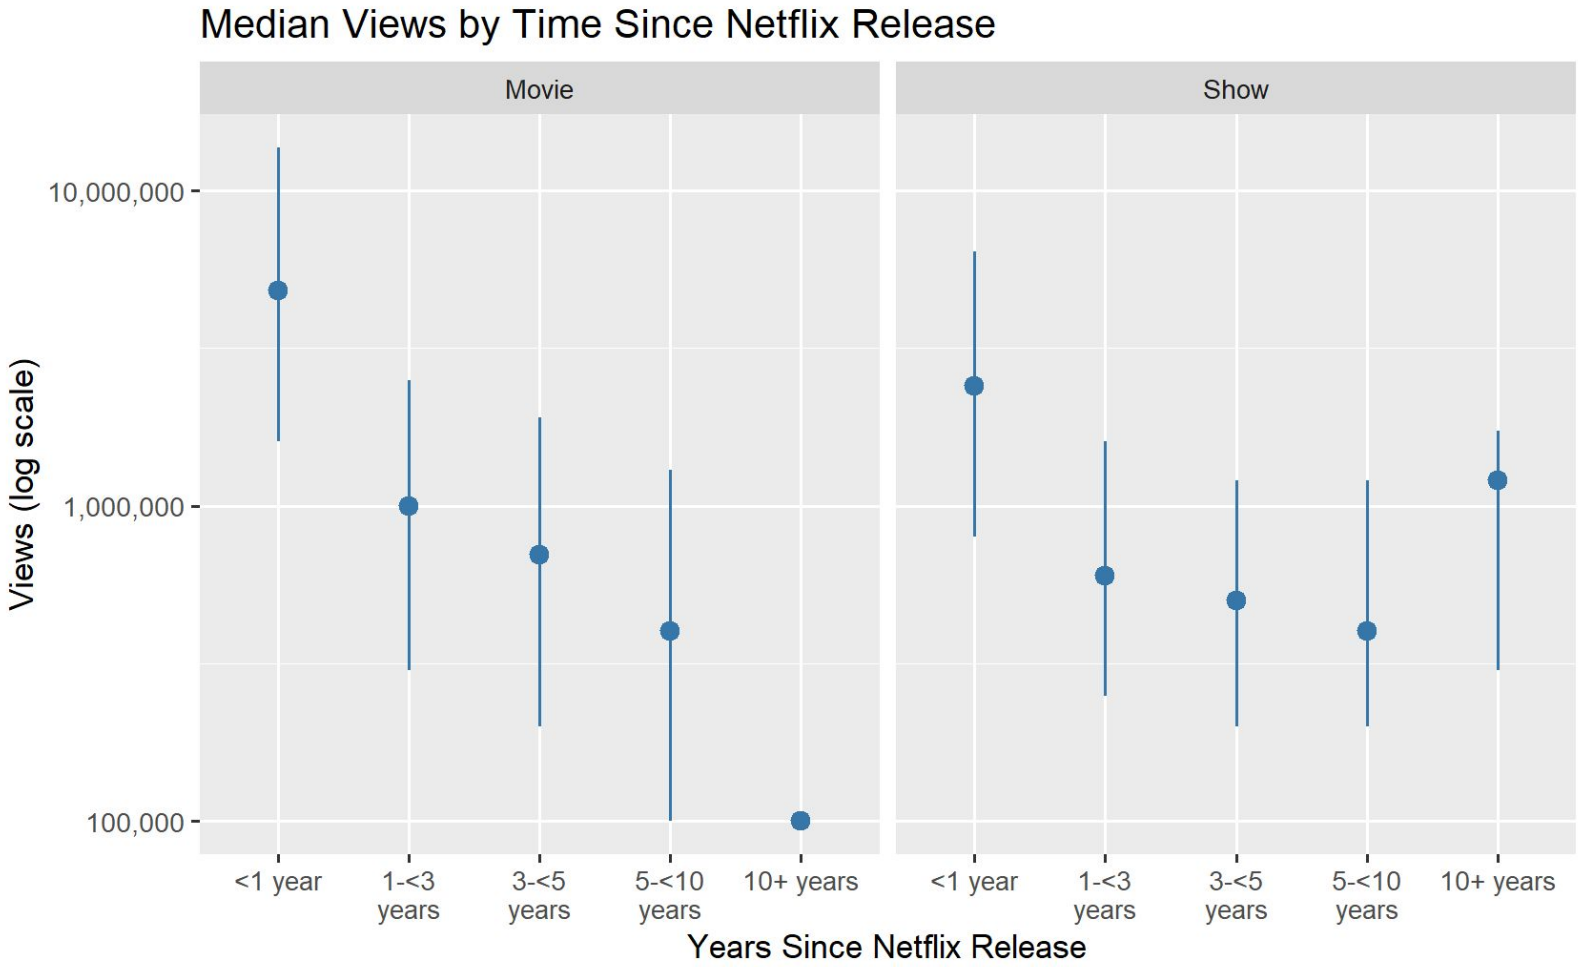

Content Age = Report end date − Netflix release date

	report	title	available_globally	release_date
1	2025Jan-Jun	Back in Action	Yes	2025-01-17

Limitation:

Calculated content age may be greater than actual age
